Business Prospectus

Create a new generation with Re Mobile

Business Description

Container Planning/Development/Assembling

A wide range of containers is available from used one to newly-build or JIS steel containers. Negative pressure unit-equipped mobile clinics include facilities for high-temperature outpatient care and beds. They are also convertible for spaces for remote working, children room, hobby, storage, garage, glamping, and mobile shop and facility. We offer a comprehensive service from order intake, assembling to installation for customers across Japan. We are not only selling but also renting and buying containers. We are serving customers from public and private sectors as well as general consumers.

PCB Waste Disposal Service

We collect and dispose of low-level and high-level PCB wastes as a licensed specially controlled industrial waste collection service. Specially Controlled Industrial Waste Collection Service
[Governor of Tochigi Prefecture License No. 00950164065]
[Governor of Gunma Prefecture License No. 01050164065]

General and Industrial Waste Disposal Service

We collect and dispose of solar panel, mercury lamp, waste oil, and high-voltage electrical equipment, etc. as a licensed industrial waste collection service. General Waste Collection Service
[Utsunomiya City License No. 347]
Industrial Waste Collection Service
[Governor of Tochigi Prefecture License No. 00900164065]
[Governor of Fukushima Prefecture License No. 00707164065]
[Governor of Miyagi Prefecture License No. 00400164065]
[Governor of Gunma Prefecture License No. 01000164065]
[Governor of Ibaraki Prefecture License No. 00801164065]
[Governor of Saitama Prefecture License No. 01100164065]

Demolition and Civil Works

We demolish residential buildings as well as store interior and handle civil works and earthworks.

Renovation Work

We renovate private houses and stores. Container home interior customizing is also possible.
[License for General Construction Service
Governor of Tochigi Prefecture License (Han-30) No. 24326]

Find new "value" and "use" in things people consider as a "piece" and don't pay attention.

Thought behind the start-up

"Collect pieces which people usually don't pay attention and fill a brand-new notebook of customers with happiness"
This is our management philosophy announced on the foundation of Piece Note in 2011. The name of our company derives from this. In the aftermath of the 2011 Great East Japan Earthquake, many people in the affected areas were shocked and just standing in front of rubbles. Piece Note was established to help such people in need. Since then, Piece Note has been working on changing people's mindset on "wastes" through our main business, waste disposal service. We embrace the concept of Mottainai and find new "value" and "use" in things people consider as a "piece" and don't pay attention and communicate it in the society.

Bring our concept into shape

Currently, we focus on the business, "Container Home", which gain popularity for its stylish appearance and robustness. We also have operated the business looking at recycling and secondary use. In addition, we collect and dispose of PCB wastes which have deadline of disposal under the law. Since we have a great deal of business experience especially in Kanto and Tohoku Regions, our clients rely on our waste collection service.

The times where unmoving things will move

Like the earth moves to enjoy the light of the sun, humankind have acquired many things through travelling since ancient times. Humankind have thriven in by improving what they acquired after settling in one place through agriculture. And today, our environment looks like being in strong tide. We are in a critical phase where we have to move unmoving things using values and technology of SDGs, AI, IoT and DX to control this strong tide. Ideal values shine better in the place should be. It means that lives, values and people change through moving. We will make progress together with people who look to the same direction.

President Kimitake Kawamura

Company Profile (License/Patent/Qualification)

[License]

Scaffolding/Earthmoving, Building Work, Roofing Work, Carpentry
Tiling/Brick Block Work, Interior Finishing Work, Demolition Work
[Governor of Tochigi Prefecture License (Han-25) No. 24326]
